RESEARCH

[Climate Change Impacts on Wildlife Webinar](#)

Researchers from the University of Wisconsin-Madison and the University of Maryland will discuss climate change impacts on wildlife, such as hummingbirds, in an OSU climate webinar on May 29.

EDUCATION

[Stone Lab Summer Lectures 2014](#)

The Stone Lab Guest Lecture Series returns for another year of expert talks on Lake Erie topics ranging from environmental science to economics. Save Thursday nights June 19 - August 7 for learning!

OUTREACH

[Climate Change & Extreme Weather Webinar](#)

A recording of the April 2014 Global Change, Local Impact climate webinar is now available online. Hear NOAA experts speak about climate change and extreme weather events in the region and beyond.

Virtual Island Visits

Wondering what Stone Lab is up to, but can't make it to the lake this summer? Three live webcams around Gibraltar and South Bass Islands let you get a taste of island life right from your computer.
