

Future Research Leaders Made Here

A summer at Ohio State's Stone Lab can not only be a grand adventure - it can also set the stage for a successful future in science. With middle school field trips, research experiences for undergraduate students and lab facilities for scientists, the lab on Lake Erie's Gibraltar Island has it all.

[Point Place Business Retention & Expansion](#)

The Point Place Business Association, in cooperation with Ohio Sea Grant and OSU Extension, has completed a survey of 112 Point Place businesses about their perceptions, plans, and concerns regarding their operations in the Toledo neighborhood.

[2014 Stone Lab Courses](#)

The course listings for the 2014 Stone Lab summer season are now available online, including introductory and advanced courses, educator classes, and non-credit workshops. Take a look at your options, and keep an eye out for application materials, which will be available soon.

[The Battle of Lake Erie Bicentennial 2013](#)

Put-in-Bay and the Lake Erie Islands celebrated the Bicentennial of the Battle of Lake Erie on Labor Day Weekend. Photos of the event, which unfolded all around Stone Lab's home on Gibraltar Island, are now available on Ohio Sea Grant's Flickr page.

Battling the Bloom

Ohio Sea Grant Director Jeff Reutter is featured in an episode of QUEST, a joint production of NPR and PBS affiliates in Cleveland. The video explores causes and effects of harmful algal blooms in Lake Erie, and includes a visit to Stone Lab.

Great Lakes Climate Website

Ohio Sea Grant and the Ohio State University Climate Change Outreach Team have developed a curated and annotated collection of Great Lakes climate change resources for educators, government officials, community planners, and the general public, to help them adapt to and mitigate the impacts of climate change in the Great Lakes region.

Lessons from History

Dr. Robert Greenbaum (Ohio State University) and Dr. Martin Luby (DePaul University) have received Ohio Sea Grant funding to study how communities that rely heavily on tourism could fare in the future, based on economic trends.
