

STONE LABORATORY 2017

INTRODUCTION TO BIOLOGICAL STUDIES – LOCAL PLANTS

COURSE DESCRIPTION

EEOB 1910: Learn plants of wetlands, shores, forest, prairies through field trips to preserves on the Lake Erie Islands and northwest Ohio, as well as in the classroom during lecture/lab sessions. Field trips will emphasize hands-on familiarization with plant identification useful for wetland and other botanical field work or natural history interpretation. Lecture/lab sessions will focus on the principles of classification, identification, and nomenclature, important characteristic of plants, conservation and plant habitats. A list of plant species, families and their habitats will be compiled for the week. Evening sessions will include plant pressing techniques and a wild edibles dinner.

DATES

July 30-August 5, 2017

LOCATION

Stone Laboratory
Gibraltar Island, Ohio
